Doctoral Studies

- **Doctoral Studies in Intellectual Property**
- The study program gives opportunity for candidates to acquaint very specific knowledge in the field of Intellectual Property Law that they could apply in their specific area of scientific, professional or professional engagement. The structure of the study program is such that provides the following:
 1. Enables the candidates to understand the system of intellectual property, its elements and, finally, specific legal institutions in the field, both through the prism of the international and national legal framework and practice in this field;
 2. Contributes to further enhancement of knowledge and skills for theoretical research of the Copyrights and Related rights and the Industrial Property Rights and the procedures and mechanisms for their protection and enforcement;
 3. Facilitates the study of the systems of technology transfer and copyrights contract law, so as to enable their practical application;
 4. Contributes to the development of knowledge and skills related to the digital aspects of the Intellectual Property;
 5. Supports the process of developing specialized knowledge and skills related to the economic and business aspects of the Intellectual property.
