PREFACE.

It is believed that these decisions of the judges on appeal, now presented to the profession in collected form, will prove an interesting addition to the literature of patent law. The decisions cover very nearly the entire period of the active life of the Patent Office. In the system of quasi-judicial investigation, or examination preceding the grant of the patent, which was instituted by the act of 1836, the judges of the Circuit and Supreme Courts of the District of Columbia have acted for many years as the tribunal of last resort. According to the provisions of the original act of 1836 the applicant was given an appeal from the decision of the Commissioner to a Board of Examiners appointed by the Secretary of State for that purpose. By the act of 1839 this appellate jurisdiction was vested in the Chief Justice of the Circuit Court of the District of Columbia. This jurisdiction was extended by the act of 1842 to include the associate justices of the court. By the act of 1870 and by the Revised Statutes now in force the appeal is taken to the Supreme Court of the District of Columbia, sitting in general term.

In their anomalous relations with an executive department, the judges do not exercise the purely judicial functions of a court of record. The judgment is recorded in the Patent Office and controls the further proceedings of the Commissioner, but does not preclude any person interested from renewing the contest in another forum. The very singularity of this relation, however, gives peculiar value to these decisions as the opinions of the judicial mind upon the many questions that arise in the Patent Office in the preliminary stages of the patent unaffected by the presumptions of law that follow the patent itself throughout the subsequent litigation. In this regard these cases furnish a line of precedents bearing upon the controversies that arise by way of bill in equity under section 4915 R. S. to compel the issuance of the patent.

For a brief period immediately following the opinion of the Attorney-General of August 20th, 1881, the Secretary of the Interior exercised concurrent jurisdiction with the court as an appellate tribunal from the Commissioner of Patents, by way of petition, in the nature of appeal. It may now be regarded, however, as definitely established by the decision of the Supreme Court of the United States in the case of The United States ex rel. R. Hoe & Co. and George C. Gill vs. Butterworth, Commissioner of Patents, (29 O. G., 615,) that the Supreme Court of the District of Columbia exercises an exclusive jurisdiction

over the judicial actions of the Commissioner. This circumstance may be thought to lend additional importance to these volumes.

Many of the decisions appearing in this volume are already well known. Some of the opinions of Judge Cranch were included in an early edition of Curtis on Patents, and individual opinions have from time to time found their way into periodicals or have become familiar by dint of citation; but as a body of judicial learning, the decisions have been practically unavailable to the profession. Many of the cases were digested by Mr. Law in his valuable digest, under the name of "The Manuscript Appeal Cases;" but, as the lawyer is aware, the syllabus without the case is but an illusive guide to the law.

This volume has been carefully and faithfully compiled from the original records on file in the United States Patent Office. It is expected that another volume of equal size will bring the Reports down to date, and it is the present intention of the author to include in the second volume the opinions of the Attorneys General in Patent Matters, now scattered through the sixteen volumes of the opinions of the Attorneys-General.

The Table of Patents, which immediately precedes the text, will enable the reader to follow the subsequent history of the application or patent under consideration in any particular case so far as it has been involved in litigation, and has been construed, sustained, or declared invalid.

FRANK MAC ARTHUR.
